## TECH STACK

### AI / ML

Gemini API OpenAI API RAG Embeddings  
Prompt Eng. Multi-Agent

### FRONTEND

React 19 Next.js 16 TypeScript Tailwind

### BACKEND & DATA

Node.js Python PostgreSQL Supabase  
Prisma Docker

### AI DEV TOOLS

Claude Code Cursor ChatGPT

### INTEGRATIONS

WhatsApp API Stripe/MP Google APIs  
Cloudflare

### TESTING & OPS

Playwright Vitest Vercel Sentry CI/CD

## LANGUAGES

English — Bilingual (C1)  
Spanish — Native

## EDUCATION

**Systems Engineering**  
UCES — Advanced coursework

## CERTIFICATIONS

> Data Integration 1 & 2  
> Python APIs & ChatGPT 4  
> Prompt Engineering (4+ yrs)

**Full-Stack AI Engineer** with 4+ years building AI-powered production systems end-to-end: SaaS platforms, WhatsApp sales bots, RAG assistants, e-commerce and enterprise healthcare. I take ideas from zero to deployed product using **Claude Code, Cursor and modern LLM APIs**. Bilingual English/Spanish.

## EXPERIENCE

### Founder & AI Product Engineer — Novamente

2024 – Present

*AI-native e-commerce SaaS with generative design • novamente.ar*

- Built an end-to-end SaaS platform: public storefront, admin dashboard with CRM, and an autonomous **WhatsApp sales bot** handling concurrent conversations
- Created an **AI design engine**: users type a prompt and get custom apparel designs — 37 styles, proprietary prompt optimizer, real garment mockups with background removal
- Implemented **Nova**, a RAG conversational assistant that generates designs, shows mockups and closes sales with payment, all within the chat (vector embeddings + tool use + streaming)
- Full checkout with payments, subscriptions and webhooks; shipping and order tracking; SEO/GEO with JSON-LD and 31+ landing pages

### Lead Developer & AI Architect — HealthTech

2025 – Present

*Enterprise healthcare management platform*

- Architected a platform of **49 domain modules and 73 routes** covering clinical, finance, compliance and provider-network workflows
- Built a **RAG chatbot** with 7+ knowledge bases and hybrid search (BM25 + semantic) for internal and patient support
- Implemented enterprise security: RBAC with 34 roles, JWT + argon2, AES-256-GCM encryption, Sentry + Prometheus observability
- Created **GitNexus**: a codebase knowledge graph with an MCP server providing architecture context to AI agents

### Systems Developer — OSPRERA

2024 – 2026

*Internal process digitization for a healthcare insurer*

- Built web portals for document management and internal process tracking, plus a complaints module and **Power BI** operational dashboards
- Replaced manual workflows with web systems, reducing member processing times

### Tax Analyst Semi-Senior — EY (Ernst & Young)

2021 – 2024

- International tax return preparation in English for multinational clients. Automated repetitive processes with **Python and VBA macros**, reducing team delivery times

## SELECTED PROJECTS

#### AI Design Engine

Apparel design system: 37 styles, proprietary prompt optimizer, real garment mockups, background removal. **Gemini API · Next.js · Cloudflare R2**

#### WhatsApp Sales Bot

Production bot: greeting, qualification, AI design generation, mockups and payment link. **WhatsApp Cloud API · Node.js**

#### Nova — RAG Sales Assistant

Chatbot that knows the catalog, generates designs live, shows mockups and closes sales with payment. **Embeddings · Supabase pgvector**

#### GitNexus

Codebase knowledge graph feeding architecture context to AI agents via MCP. **Graphology · Sigma.js · MCP Server**
